2026 Data & AI Portfolio

2026 Data & AI portfolio and sales bag

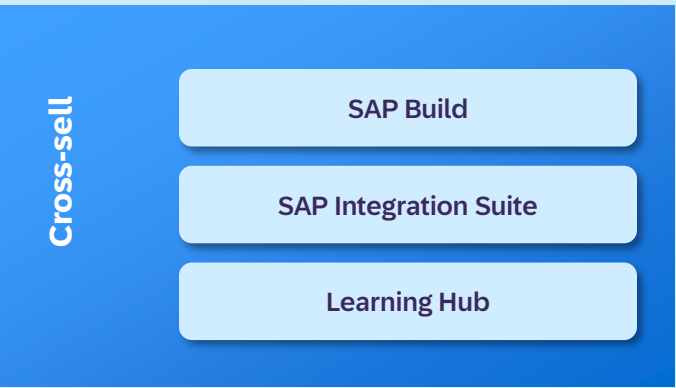

Data & AI is combined into one solution area. As such, we are responsible for the entire number.

AI follows the pool sell model with all solution areas contributing, including BDC&AI SSEs.

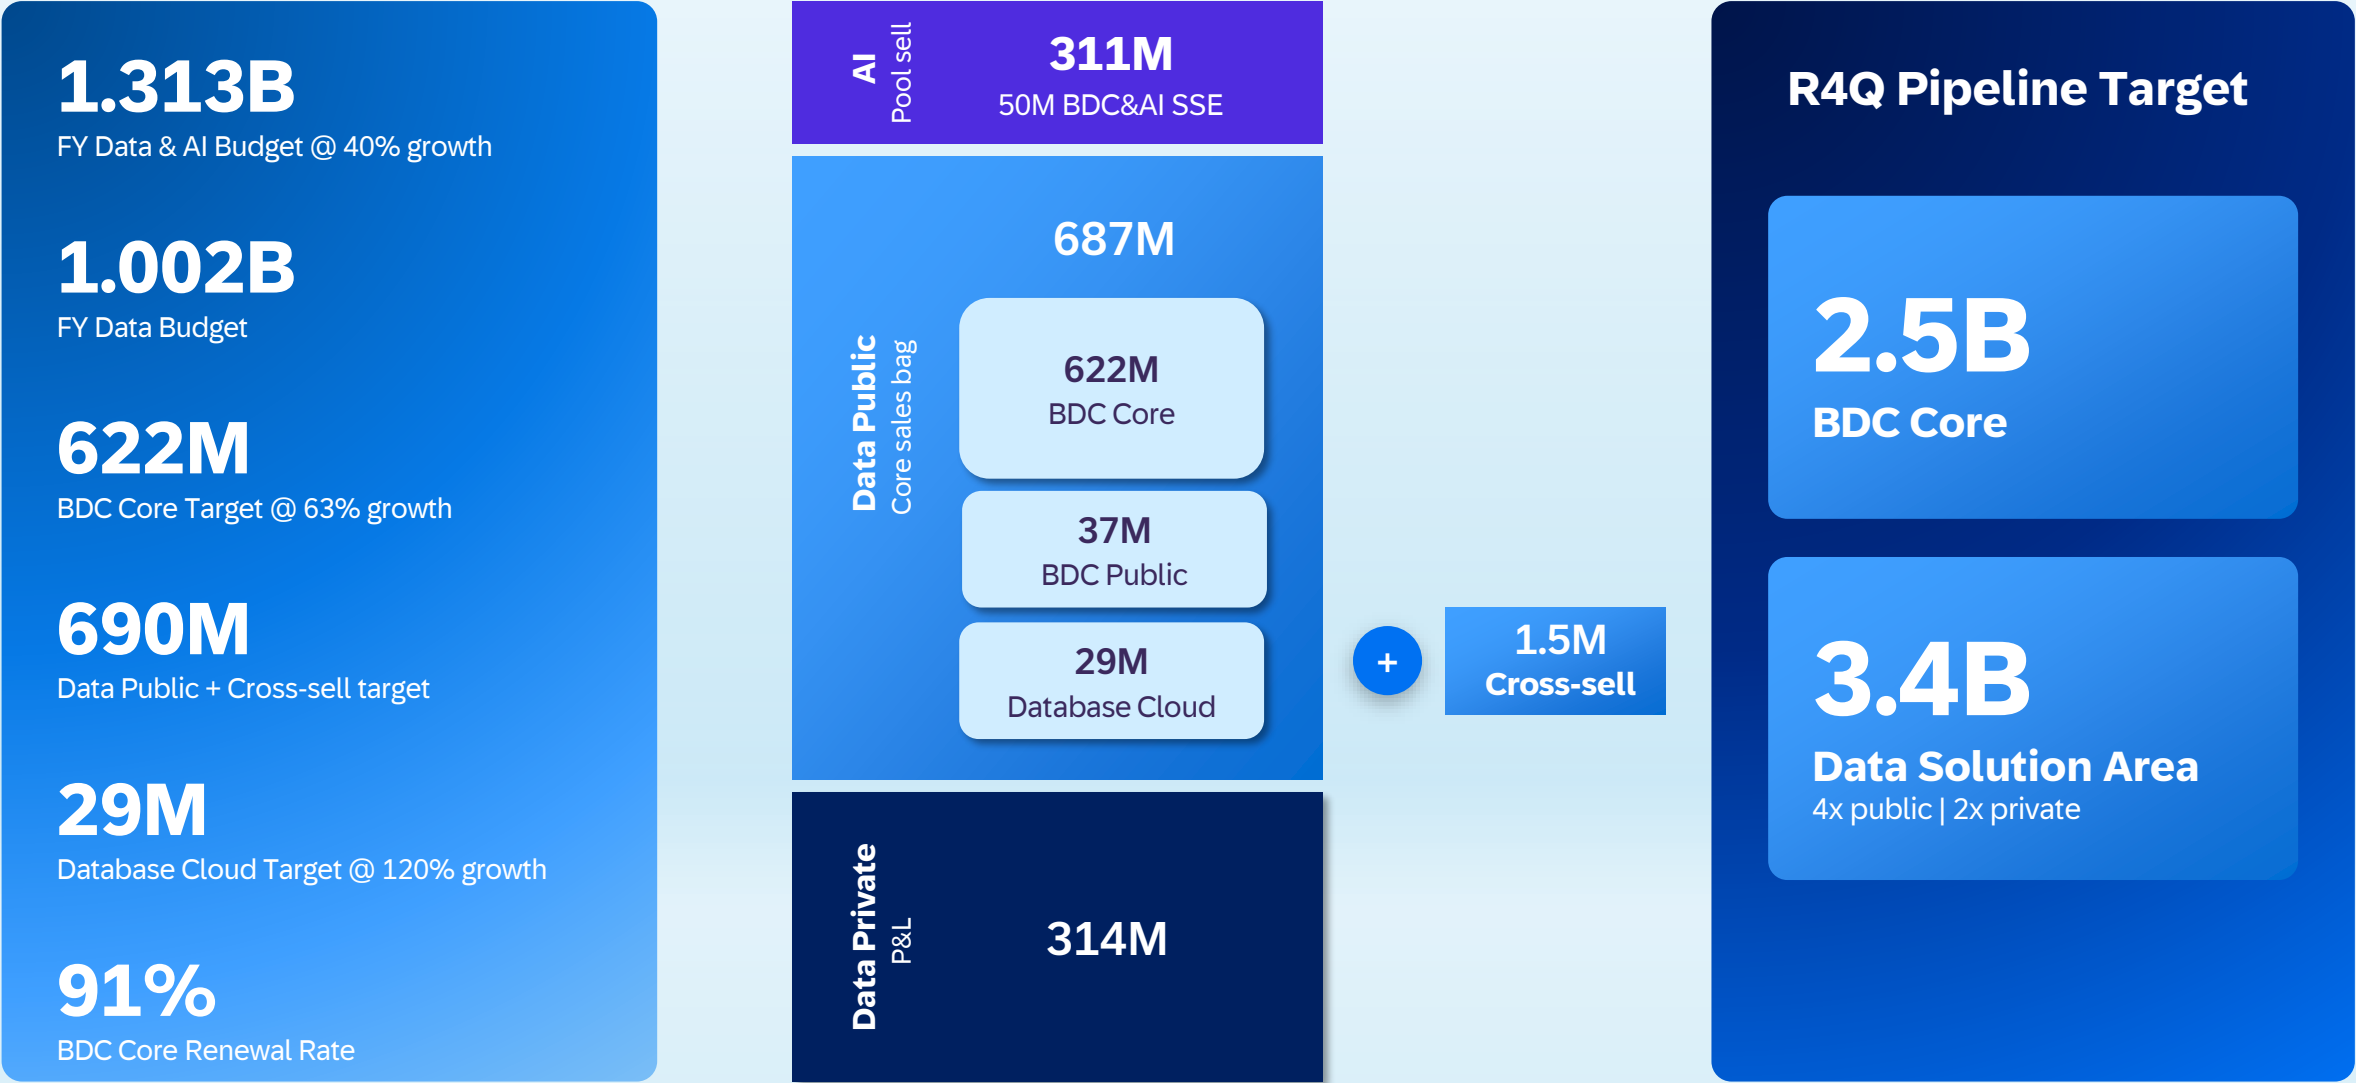

BDC&AI SSEs and **Sum of People (FLSM)** has the core sales bag ownership of **Data Public** with compensation and churn impact.

BDC&AI P&L roles carry the budget and churn of the entire Data & AI solution area, including private cloud.

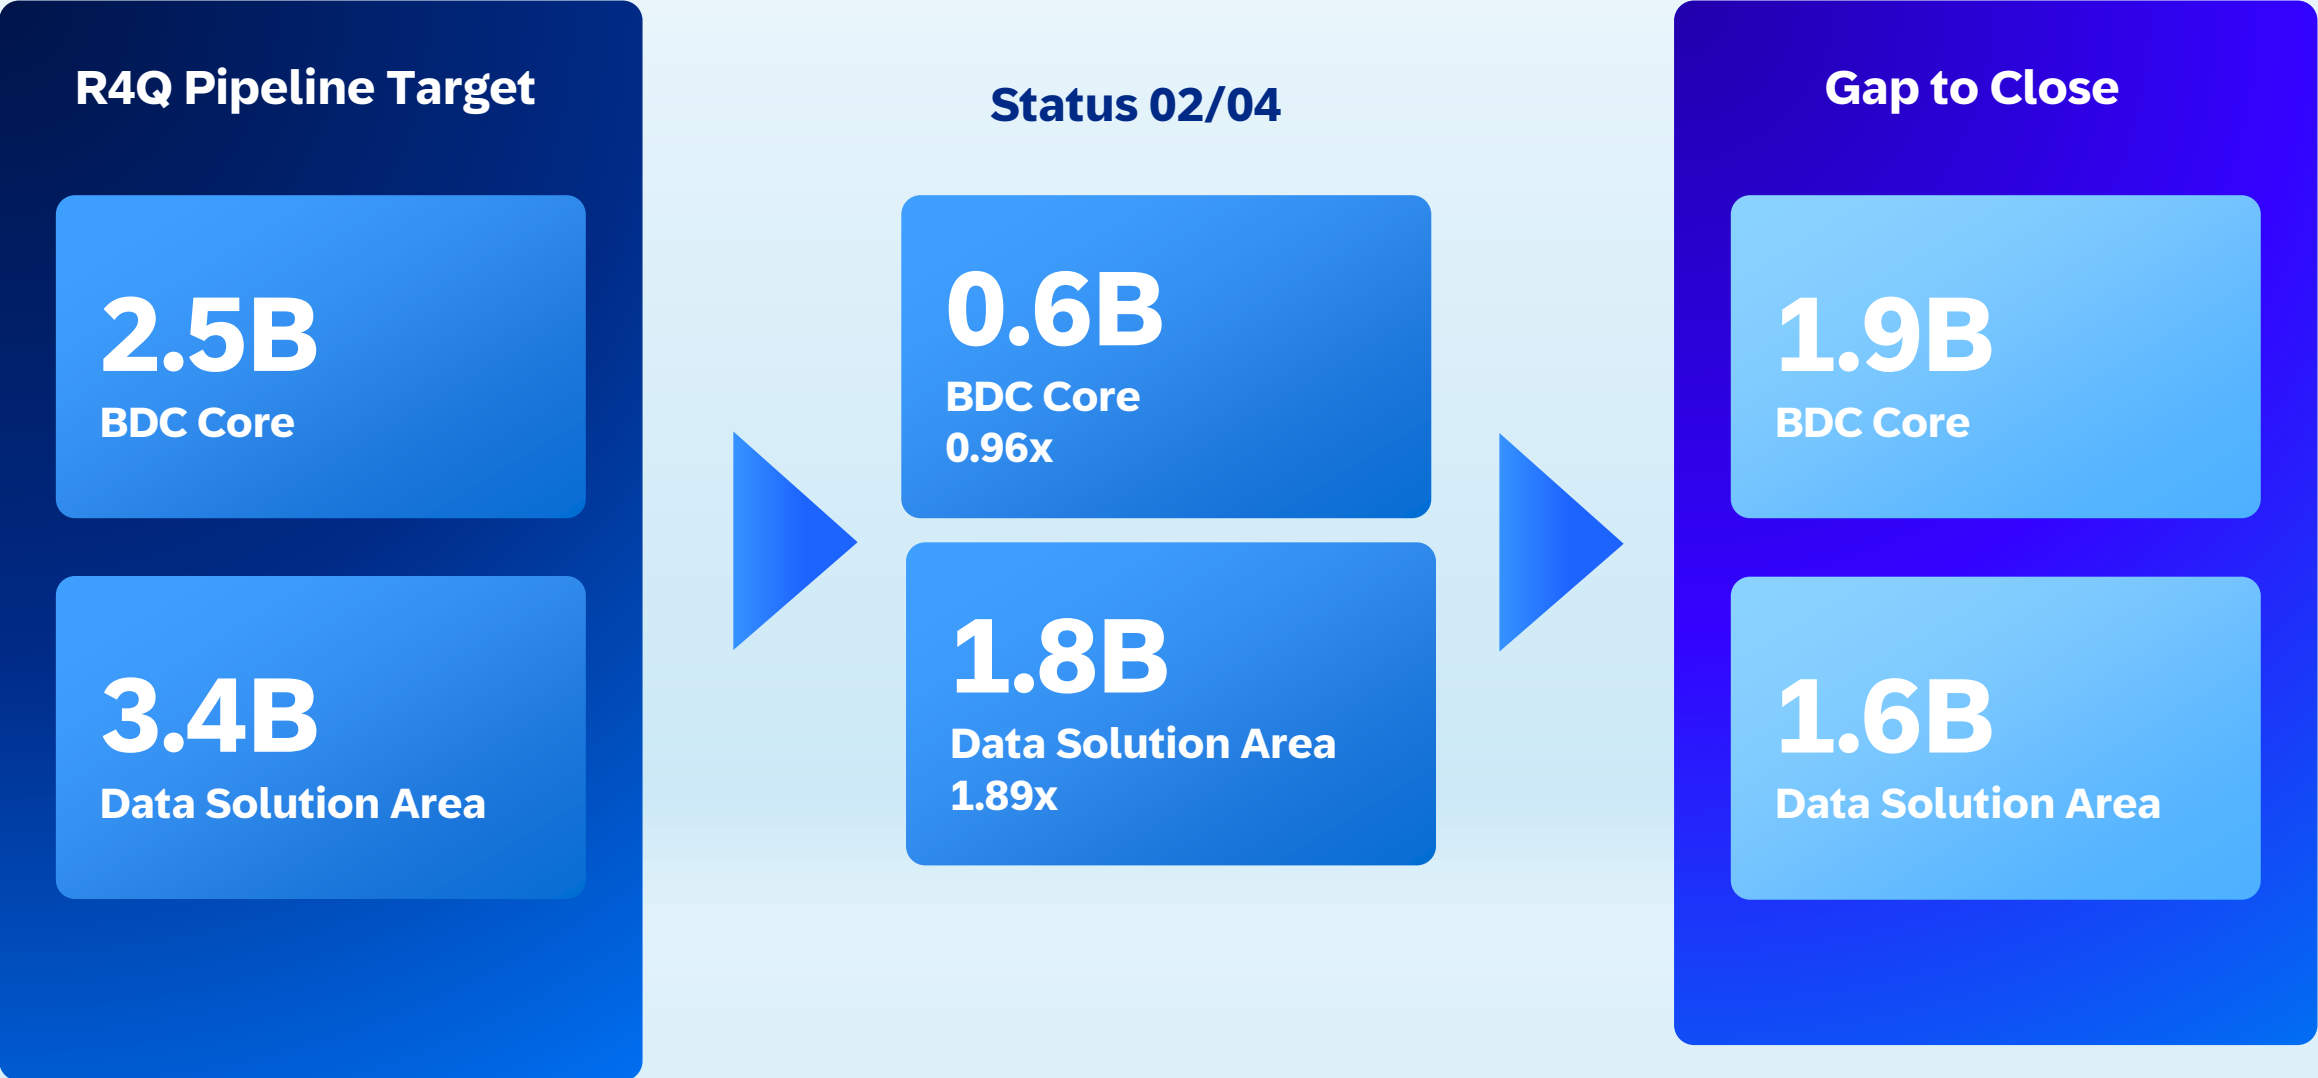

Customer Data Platform (CDP) standalone is 3x eligible for CX and BDC&AI SSEs. Note upcoming road map on integration into BDC Data Composer.

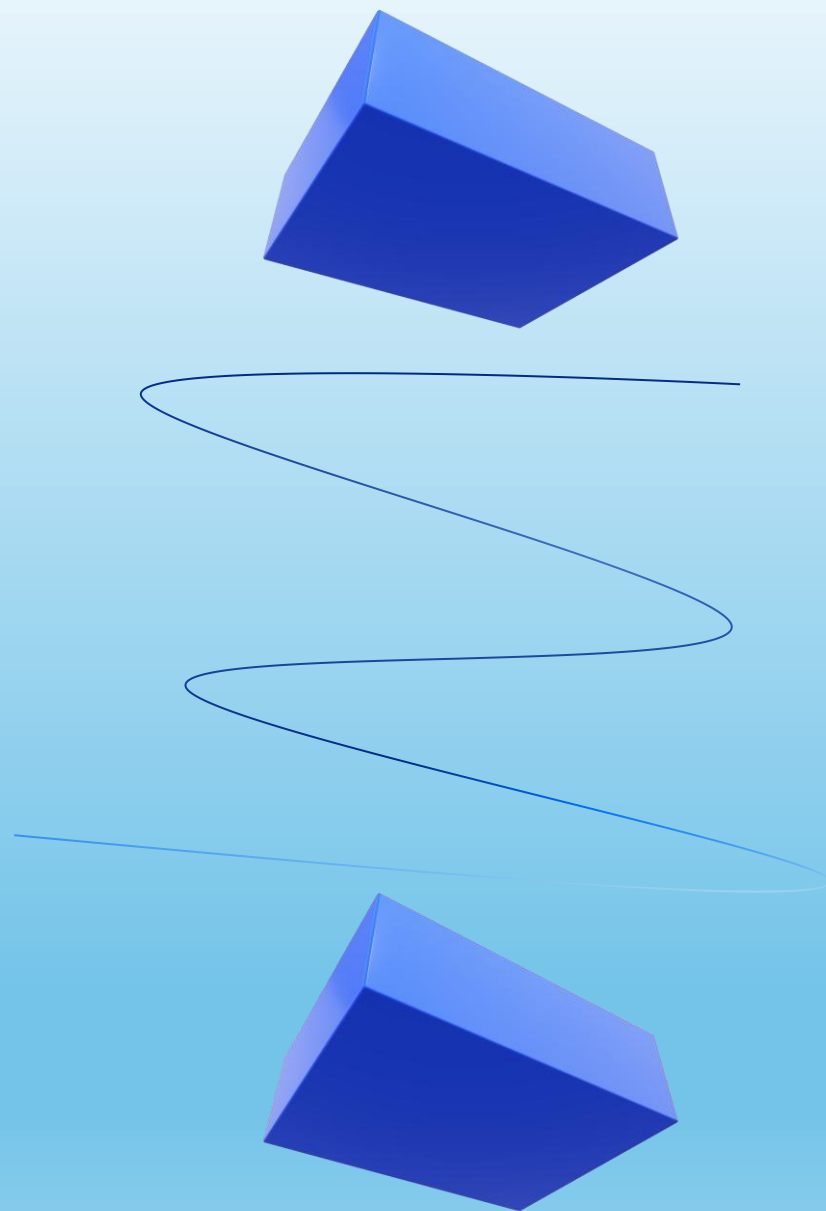

Welcome to the Billionaire's club

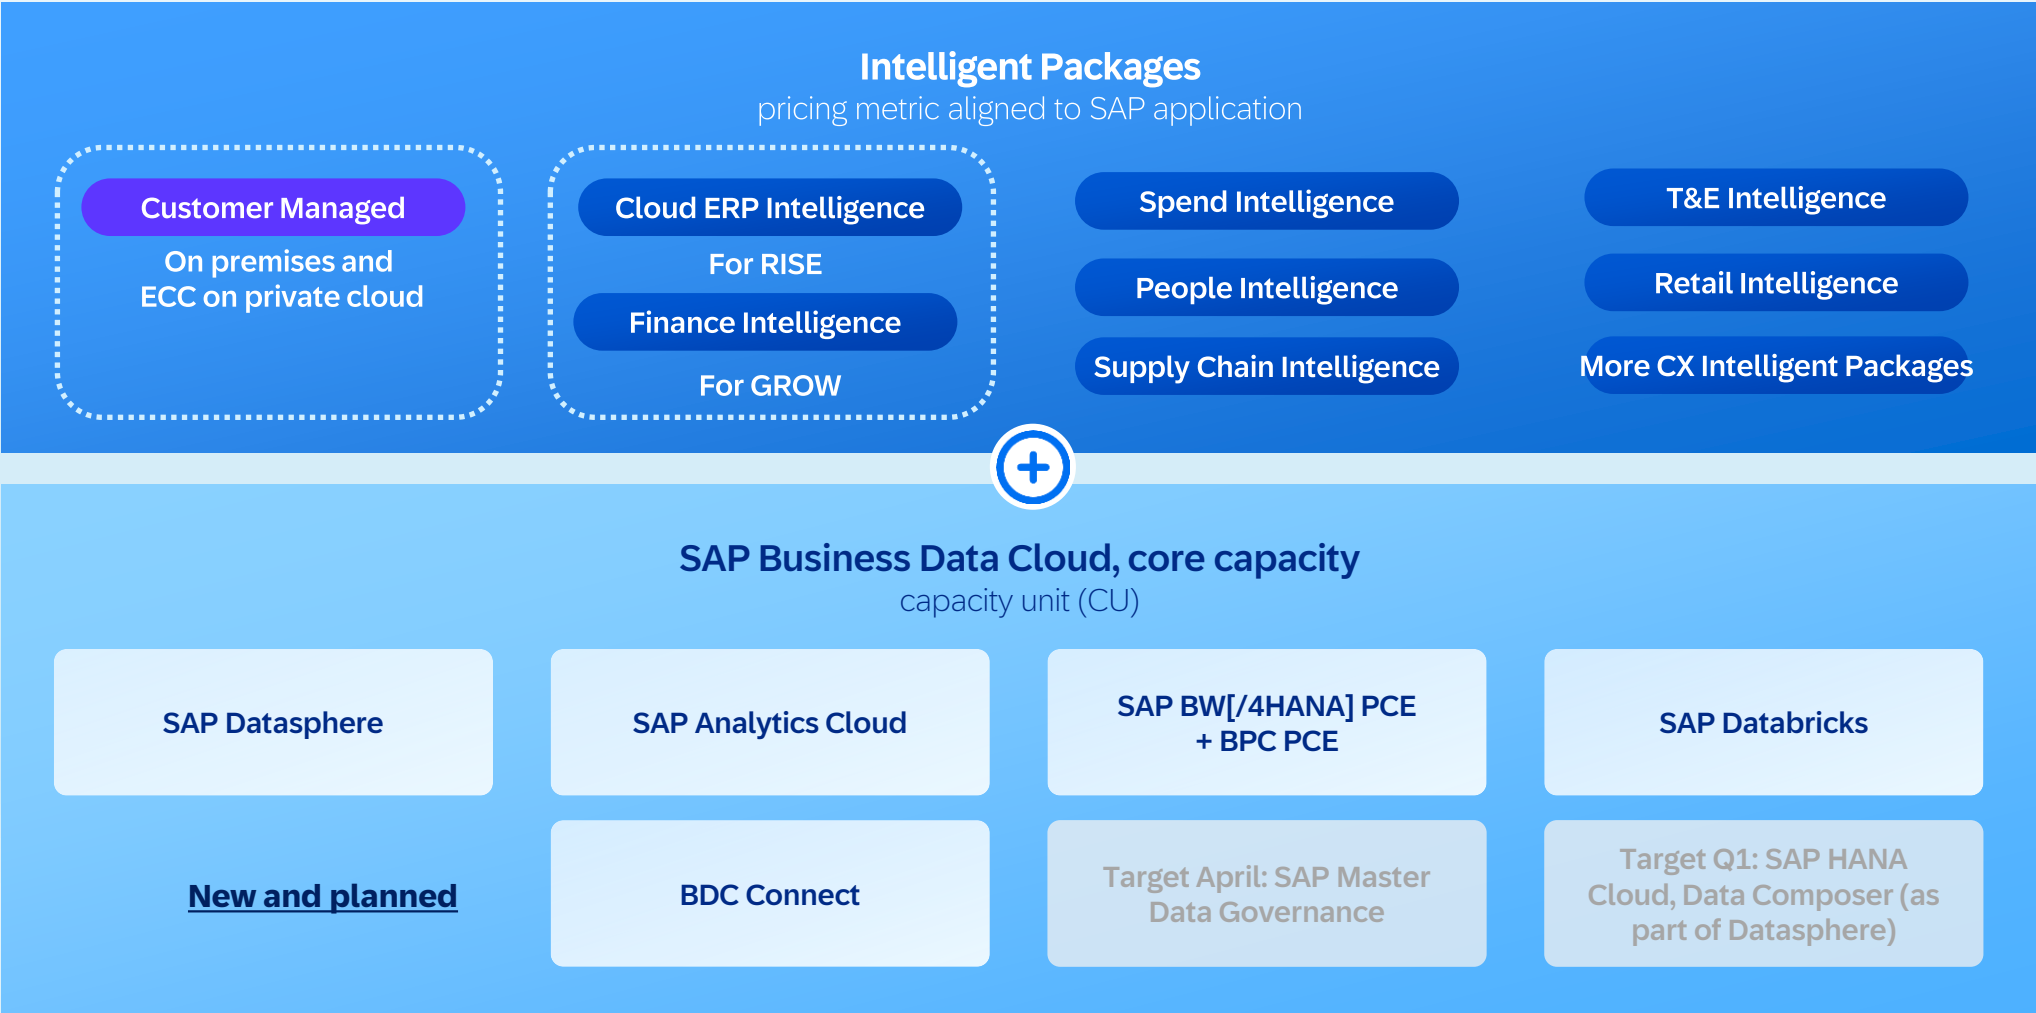

Start of the year pipeline status

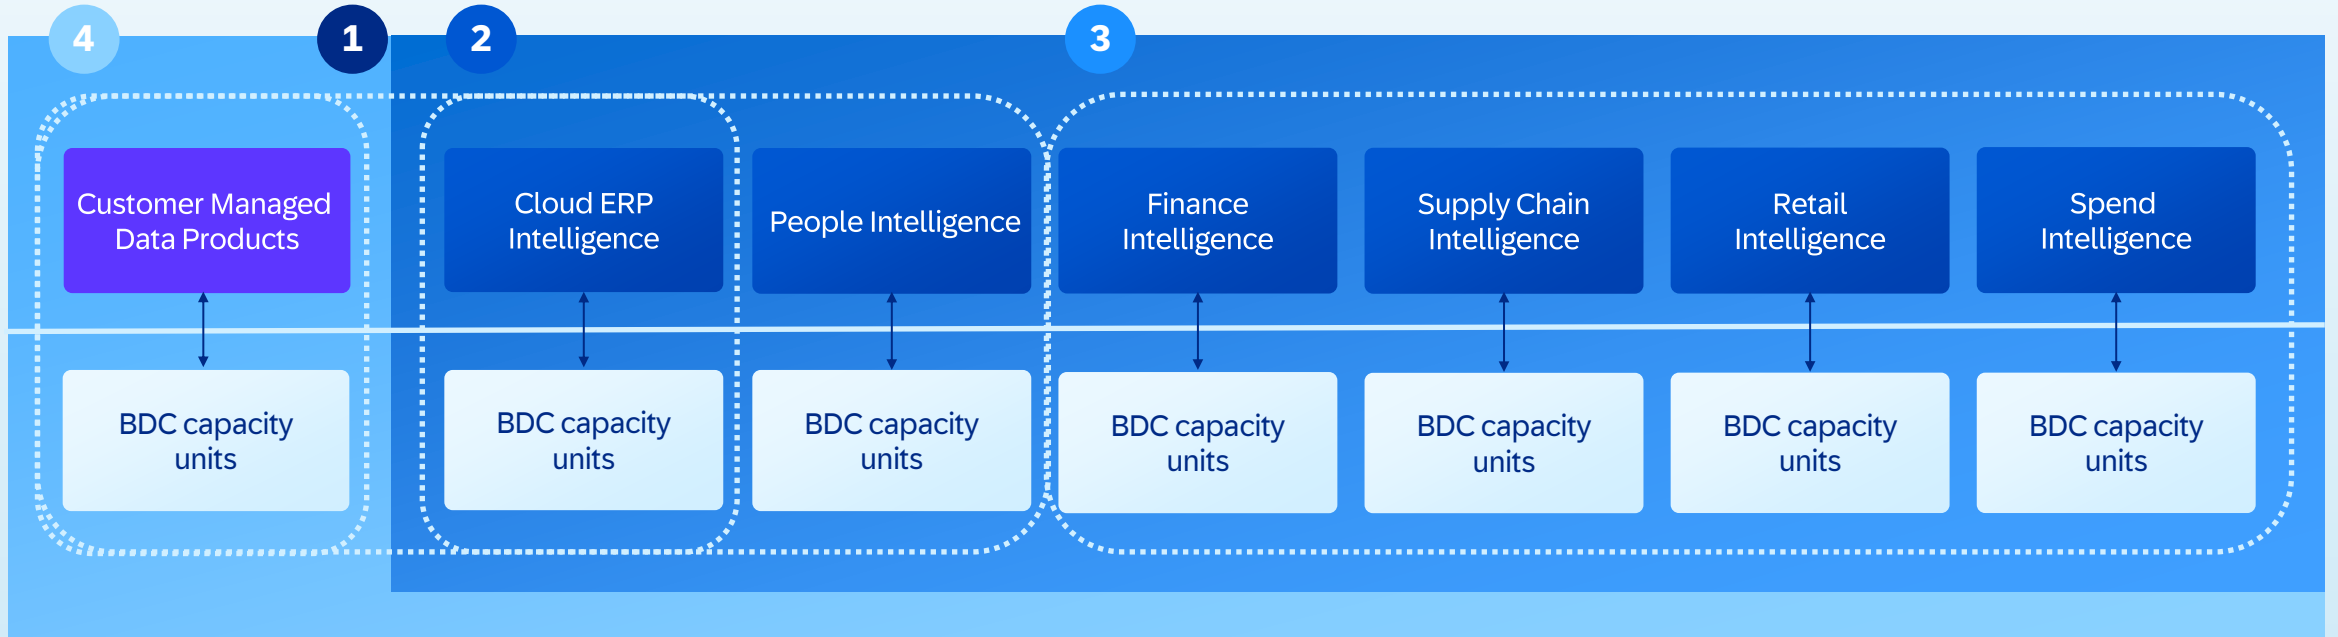

Ratio-Based Model

BDC and Intelligent Packages commercial structure

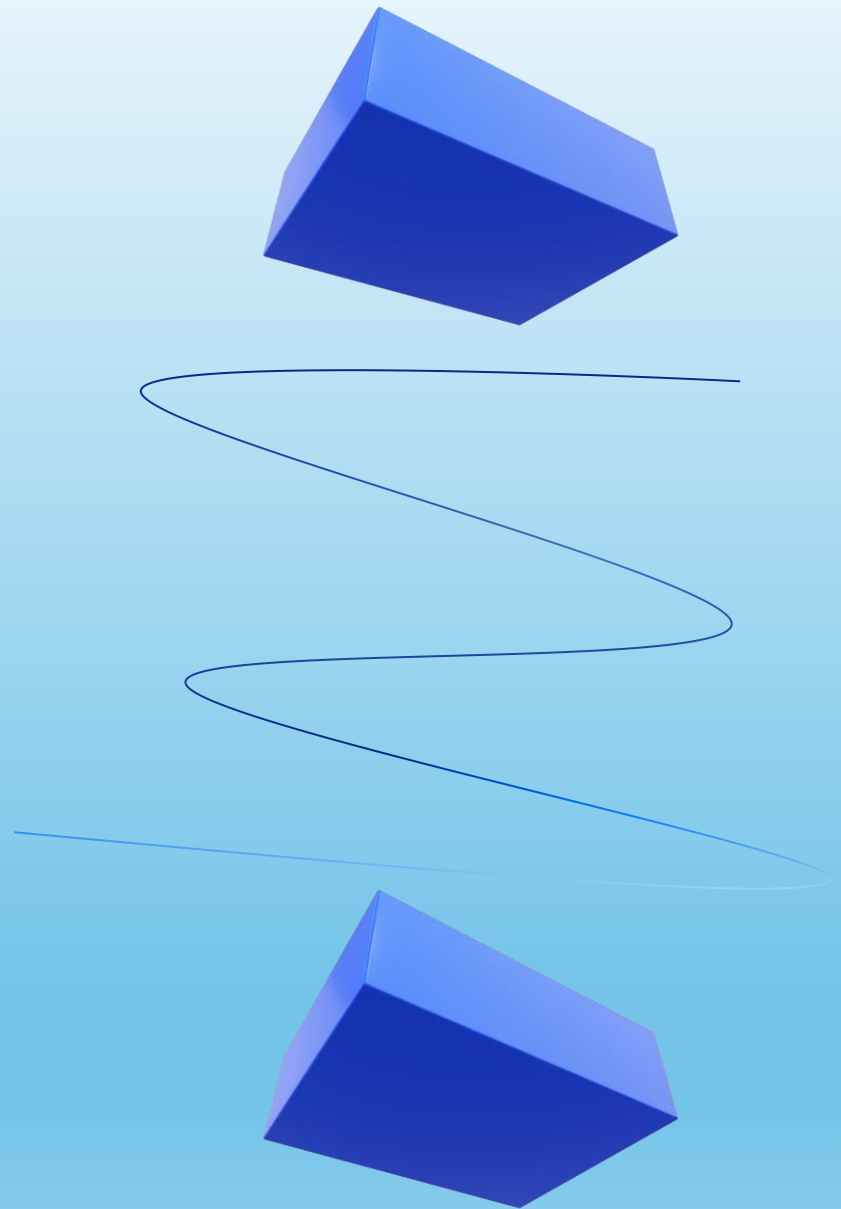

Ratio-based model and sales compensation

Scenario	How ratio-based sales model works
1 IT motion for BDC core without any LoB Intelligent Package	Customer Managed Data Products and BDC credited to BDC SSE. For subsequent IT motions, additional BDC capacity by BDC SSE can be sold without additional attach
2 Single LoB solution with Intelligent Package	Predefined ratio of BDC CUs auto-attached and fully credited to LoB. For Cloud ERP Intelligence for RISE, the auto-attached BDC CUs are credited to BDC SSE.
3 Multiple LoB Intelligent Packages	Predefined ratio of BDC CUs auto-attached and fully credited to each respective LoBs
4 LoB Intelligent Packages with IT motion (BW modernization, ML, data engineering)	Predefined BDC ratios auto-attached and fully credited to the respective LoBs with remaining BDC credits assigned to BDC SSE. Customer Managed Data Products is not required as the Intelligent Packages satisfy the pre-requisite.

Sales Plays

2026 BDC sales plays

**Ignite AI with
Business-
Ready Data**

**Accelerate AI
Data Gravity
with Open
Data
Ecosystem**

**Extend HANA
Cloud with

sales plays
by each LoB

2026 BDC sales plays

Ignite AI with Business-Ready Data

Ground AI in Business Context

Turn data into competitive advantage by delivering AI with full business context, powered by a unified business data fabric.

Transform BW Data into an AI Powerhouse

Fuel your AI data economy with semantically-rich, AI-ready BW data products.

Unleash the Autonomous Enterprise

Drive decisive, enterprise-wide action with AI-powered Intelligent Packages built on harmonized data

**Accelerate
AI Data
Gravity with
Open Data
Ecosystem**

**Extend HANA
Cloud with AI-
Ready
Business Data
Fabric**

2026 BDC sales plays

Accelerate AI Data Gravity with Open Data Ecosystem

Unleash AI Instantly

Activate frictionless AI intelligence with zero-copy data sharing.

Elevate the SAP data economy

Integrate effortlessly into customers' data architectures.

Maximize BDC impact

Expand BDC value with industry-tailored intelligent AI applications and enriched data products.

Ignite AI
with
Business-
Ready
Data

Extend HANA
Cloud with AI
Ready
Business Data
Fabric

2026 BDC sales plays

Ignite AI
with
Business-
Ready
Data

Accelerate
AI Data
Gravity with
Open Data
Ecosystem

Extend HANA Cloud with AI-Ready Business Data Fabric

Modernize Your SAP HANA

Leverage your existing investment in SAP HANA and move to SAP HANA Cloud via self-service migration, establishing a foundation for a business data fabric & Intelligent Packages.

Extend & Augment HANA Cloud with BDC

Extend SAP HANA Cloud with SAP Business Data Cloud to leverage robust metadata cataloging, integrations, and data products of a full business data fabric.

Augment SAP Business Data Cloud with SAP HANA Cloud for additional scale, elasticity and advanced analytics of a fully cloud-native, multi-model database.

2026 BDC sales plays target segments and tactics

Ignite AI with Business-Ready Data

- ▶ Transform all Datasphere and SAC customers to BDC
- ▶ Transform all BW and MDG customers to BDC
- ▶ Position Intelligent Packages and BDC in RISE deals
- ▶ Incubation: Drive net new deals for Customer Data Platform (CDP)

Accelerate AI Data Gravity with Open Data Ecosystem

- ▶ Joint GTM targets for BDC-Databricks
- ▶ Joint GTM targets for BDC-Google
- ▶ Joint GTM targets for BDC-Snowflake
- ▶ Joint GTM targets for BDC-AWS

Extend HANA Cloud with AI Ready Business Data Fabric

- ▶ Target HANA on premise customers with HANA Cloud use cases
- ▶ Joint GTM targets for BDC & HANA Cloud

2026 BDC sales plays target segments

Ignite AI with Business-Ready Data

1

Datasphere customers

Target: All Datasphere customers and a subset of SAC Cloud Foundry customers

Tactic: Rewire Datasphere and SAC customers and elevate their data modernization and AI strategy

2

BW and MDG customers

Target: BW on-prem customers with SAC licenses, MDG on-prem customers, and BW and MDG private cloud customers

Tactic: Create and share AI-ready data products from trusted, business critical business data

3

RISE pipeline

Target: RISE pipeline in deal size > €500K with no BDC

Tactic: Attach BDC, Intelligent Packages with Data Products and BDC Connect to deliver AI-powered insights built on trusted business data fabric

4

Incubation (TBD-Q2):
Drive net new deals for
Customer Data Platform
(CDP)

2026 BDC sales plays target segments

Accelerate AI Data Gravity with Open Data Ecosystem

1

BDC & Databricks target

Seg 1: Identified joint customers and prospects

Seg 2: BW/Datasphere/SAC customers in priority industries¹

Seg 3: Upsell and drive adoption in BDC and Datasphere accounts with low consumption with BDC-Databricks use cases

2

BDC & Google target

Seg 1: Move Datasphere and SAC accounts on GCP to BDC

Seg 2: Upsell Intelligent Packages and BDC in RISE accounts running on GCP

Seg 3: Position BDC with BDC Connect in Google BigQuery accounts

3

BDC & Snowflake target

Seg 1: SAP Snowflake (solex) targets nominated by Snowflake

Seg 2: Position BDC Connect for Snowflake in the Snowflake installed base

4

BDC & AWS target

Seg 1: AWS nominated prospects for BDC-AWS co-sell and funding

Seg 2: Upsell Intelligent Packages and BDC in RISE accounts on AWS, extend it with BDC Connect with SageMaker, Databricks or Snowflake

¹ Priority industries for Databricks: Retail, Consumer Products, Life Sciences, Oil & Gas, Utilities, Manufacturing, High Tech

² Priority industries for Google BQ: Healthcare, Consumer Products, Life Sciences, Manufacturing, Technology Media and Entertainment (TMEG)

Intelligent Packages

Executive summary

Targeted Value

Intelligent Packages provide **entitlements to data products** and deliver **deeper insights and KPIs** for specific Lines of Business (LoBs) and/or industries. They **combine data** from SAP and non-SAP products to provide a comprehensive view. Their capabilities range from analytical insights that represent the current business state to advanced trend analysis used for future planning and forecasting. Additionally, the vision is that these apps drive **strategic business advancements** by leveraging the latest generative AI technologies.

Path Forward

- **Adoption** of data products and applications depend on the customer's ability to **adapt and extend SAP standard deliveries**. Extensibility remains a continuous effort across the entire stack throughout 2026 and will mature over time.
- To scale, we must **enable the partner ecosystem** to build data products and applications. In the first phase (H1), we will provide partners with the necessary landscapes and tooling to develop custom data products and insights (SAC/Datasphere content) in the customer space.
- Initial application and content scopes will showcase the value of data product consumption, but offering truly “intelligent” applications is a journey that will evolve as **BDC platform, SAP Build, and App Foundation further mature** and **LoB applications further adopt available AI** features.

Execution status by Intelligent Package (1/3)

Intelligent Packages	Contains				Status / Plan*
	Intelligent Packages (DP Consumption)	Analytical Benefit	Insights (examples)	Data Product	
Cloud ERP Intelligence Private RISE	Working Capital Insights + Sales Finance Hub + Sustainability Control Tower	As explained in Finance	Insights for these apps are the same as mentioned in Finance	235	GA
People Intelligence HCM	Workforce composition, compensation/learning/Goals/Performance/ Succession/ Recruiting/Career development insights	Visibility into workforce trends, empowers HR leaders to strengthen employee satisfaction, boost retention, manage talent deployment and movement strategies. Provides 360-degree actionable insights into employee.	- Headcount by key dimensions - Termination Rate by key dimensions - Compa-ratio distribution by key dimensions	55	GA
Retail Intelligence Customer Experience	Demand and Inventory Planning (49 DPs from S/4 and CX)	Optimizes core supply-chain planning for retailers.	Demand planning: Detailed Forecast Analysis, Forecast comparison Scheduling: Delivery Schedules for supply networks, Event Calendar Replenishment: Order Proposals, Stock Projections	51+	Early Access Feb 2026 GA Q2 2026
Revenue Intelligence Customer Experience	Revenue and Pipeline Health (20+ DPs)	Offers leading indicators to track, predict and flag deviations on revenue growth , sales performance and efficiency	- Total Revenue by region / channel/ product - Forecast Risks - Gross Margin Trends - Sales Target, Sales Cycle Length	54	In progress / EA Release Q2-Q3 2026
	Customer Lifecycle and Retention (20+ DPs)	Focus is on protecting and growing the existing customer base , to ensure sustainable growth, and tracking new customer acquisition.	- Customer Lifetime Value - Churn Rate - Renewal Risk by Segment / Product / Region		

Execution status by Intelligent Package (2/3)

Intelligent Package	Contains				Status / Plan*
	Intelligent Packages (DP Consumption)	Analytical Benefit	Insights (examples)	Data Product	
Consumer Products Intelligence Customer Experience	Revenue Growth Management (10+ DPs from S/4)	Base for account planning , tracking, management , execution, and analysis of trade promotions for consumer products	Customer P&L: Gross Sales Value, Net Sales Value, Profit & Gross Margin Brand P&L: Gross Sales Value, Total Trade Spend Trade Analytics: Return on Investment (ROI), Baseline Net Sales Value	24+	In progress / EA release Q2.26
Supply Chain Intelligence Supply Chain	SC Insights (45 DPs)	Brings together data for different components of supply chain like production, logistics, sustainability, cost etc. to monitor, analyze and trigger actions	In evaluation and definition stage . Possible areas: - Production Insights, Logistics Insights - Maintenance insights ...etc.	46	Development to start beginning 2026 / Release end of H1.2026
Spend Intelligence Finance & Spend	Spend Analysis & Insights (26 DPs)	Consolidates spend data from SAP and non-SAP sources and uses SAP Business AI to classify, normalize, and enrich it	- Spend amount, Transactions, Suppliers - Savings identified (\$), realized (\$), risk score	65+	In Progress / EA Q1 and GA Q2.2026
Travel & Expense Intelligence Finance & Spend	Expense and Workflow Analysis (11 DPs)	Dashboard offers a comprehensive overview of your company's financial landscape	- Expense Reports, Workflow Cycle, Median Days - Top Spending Employees, Spend Trend	12	In Progress / EA Q2.2026
	Card Program Mgmt & Trans Analysis (11 DPs)	Streamlining processes by offering insights that empower strategic financial decisions .	- Top Spend by Vendor, employee, Payment Type - Adoption Rate		
	Travel Overview (2 DPs)	A landing page for Concur users managing corporate travel .	- Travel Bookings (rail, air, car, hotel) - Travel Bookings distribution by category		
	Intelligence Recommendations (10 DPs)	A hub for spending insights , spotlight top recommendations on customer's landing page	- Workflow efficiency recommendations - Unprocessed expense reports recommendation		

Execution status by Intelligent Package (3/3)

Intelligent Application	Contains				Status / Plan*
	Intelligent Packages (DP Consumption)	Analytical Benefit	Insights (examples)	Data Product	
Finance Intelligence Finance & Spend	Working Capital Insights (10 DPs from S/4)	Live monitoring of cash flow and financial data for better decision making	- Net Working Capital , Cash Conversion Cycle - Total Liquidity , ROCE(Return on Capital Employed) - EBIT , Capital Employed , Total Net Sales - Interest , Current Liabilities , Cost of Sales - Income Tax , Net Income , Liquidity	259	In Progress / after Q1.2026
	Workforce Analysis (8 DPs: 4 S/4, 4 SFSF)	Unified visibility into workforce expenses and headcount trends by combining Data Products from S4 and SFSF	- Salary per FTE - Overtime % , Payroll Tax % , Payroll Other % , Bonus % - Commission%, Commission per sales FTE		In Progress / Q2.2026
	Commercial Project Margin Insights (9 DPs, 8 from S/4, 1 SFSF)	Combines data for Professional Services Projects from S4 and data from Success Factors, Concur and Fieldglass to analyze Margin and Performance of Prof Serv deliveries and trigger actions to improve	Project Financial: Recognized Revenue, Margin, Baseline Billing: WIP Amount, Billed revenue, WIP hour check Planning: Baseline , Ongoing Margin, Forecasting Margin Spending: Total expenses by types, Budget utilization Workforce: Internal / Contingent Worker Utilization %,		In Progress / Q3.2026
	Sustainability Control Tower (8 DPs SFSF)	E2E sustainability reporting from scope definition to AI-driven reporting with automated data acquisition from SAP system	Metrics as per ESRS Standards		In Progress /Beta Q1 and GA Q2.2026
	Sales Finance Hub (13 S/4HANA DPs)	Essential finance and sales cross-analytics , combined to facilitate quicker insights for action for strategic decision makers.	Sales: - Sales volume over time - Net Sales volume by sold to party, Cancellations - Open Billing Requests by Sales orgs, customer grp, etc Finance - Gross Revenue by period, profit center, region, etc - Net Revenue, Gross Margin, Net Margin		TBD only after release for Cloud ERP Private Q2.2026
